

## Description

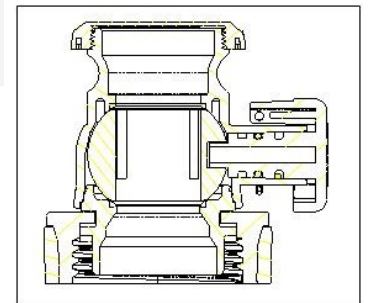

IBC North America continues to bring innovation to the marketplace with its new 2" poly ball valve with camlock end and integrated check flap (patent pending). This valve is completely free of metal or mechanized parts for corrosion resistance and complies with 2010/11 EPA regulations for Pesticides used in IBCs.

Complies with  
2010/11 EPA  
regulations for  
Pesticides used  
in IBCs

## Features

- Check valve is oversized to allow for limited flow obstruction
- Tested at high pressure for backflow prevention
- Free of metal or mechanized parts
- Complies with 2010/11 EPA regulations for Pesticides used in IBCs
- Economical design provides compliance at an attractive price
- Available on new, remanufactured and washed out composite IBCs from IBC North America

## Materials of Construction

Valve Body - Polypropylene  
Check Flap - Rubber  
Collar Gasket - Santoprene or Viton  
Stem O-ring - Rubber
